Rohan Kishorsingh Rhekwal

SOFTWARE ENGINEER

rohanrhekwal20@gmail.com | +91 7757837816 | linkedin.com/in/rohanrhekwal | Portfolio: rohanrhekwal.github.io

PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience building, integrating, and deploying full-stack applications in fast-paced startup environments, including recent hands-on experience in the FinTech domain across stock trading and cryptocurrency platforms. Experienced across frontend, backend, real-time systems, payment integrations, cloud infrastructure, and application observability using JavaScript, TypeScript, Python, React.js, Node.js, FastAPI, REST APIs, WebSockets, SQL/NoSQL databases, and AWS. Startup experience has provided opportunities to take ownership across multiple areas of the engineering lifecycle, from feature development and third-party integrations to production deployments, monitoring, troubleshooting, and technical mentoring.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, Python, SQL
Frontend	React.js, Next.js
Backend	Node.js, FastAPI, Flask, REST APIs, WebSocket
Databases	MongoDB, SQL
Cloud & AWS	EC2, RDS, S3, Lambda, Amplify, App Runner, Route 53, Lightsail, ECR, Secrets Manager, CloudWatch
Observability	Grafana Cloud, OpenTelemetry, Application Monitoring, Metrics & Dashboards
Tools	Git, GitHub, NPM, Payload CMS, OpenAI APIs, HubSpot CRM, Payment Integration

PROFESSIONAL EXPERIENCE

Software Engineer

Mar 2025 – Present

KrafIT Technologies Private Limited • Hyderabad, Telangana

- Engineered and delivered full-stack FinTech applications across B2B stock trading, B2C cryptocurrency trading, and web/mobile platforms, contributing across frontend, backend, integrations, cloud infrastructure, and production environments.
- Developed Niyam Trade, a B2B multi-broker and multi-order stock trading platform, implementing trading workflows, order-management functionality, broker integrations, backend APIs, and React.js frontend features.
- Developed Niyam Crypto, a B2C cryptocurrency trading platform, delivering Algo Trading, Signal Bridge Trading, and F&O Trading capabilities across frontend and backend services.
- Implemented WebSocket-based real-time communication across Niyam applications to receive and display live market and trading prices, enabling timely delivery of real-time trading information to users.
- Developed backend services and APIs using Python, FastAPI, REST APIs, and MongoDB, and implemented payment workflows and APIs supporting trading and application flows.
- Worked extensively with AWS services including EC2, RDS, S3, Lambda, Amplify, App Runner, Route 53, Lightsail, ECR, Secrets Manager, and CloudWatch across hosting, databases, storage, serverless workloads, deployments, networking, containers, secrets, and monitoring.
- Integrated OpenTelemetry with Grafana Cloud for application observability and monitoring, improving visibility into application behavior and production issues.
- Investigated and resolved production application, deployment, infrastructure, database, and integration issues using application logs, CloudWatch, and observability data; contributed to production deployments and cloud configuration.
- Provided technical mentoring to interns, including implementation guidance, debugging support, code reviews, and development best practices.

Software Engineer

Mar 2023 – Feb 2025

EnLume Technologies Pvt. Ltd. • Hyderabad, Telangana

- Built and maintained full-stack web applications using React.js, Node.js, Payload CMS, and REST APIs, developing reusable components, backend services, and CMS integrations.
- Engineered an AI-powered brochure generation workflow that reduced manual effort by 70%, streamlining content creation and improving operational efficiency.
- Integrated OpenAI APIs into dynamic page creation workflows, automating website content generation and increasing content delivery efficiency by 60%.
- Led the migration of the company website from WordPress to Payload CMS, improving website performance by 50% and enabling faster content updates.
- Enhanced and maintained the company website with new features that increased user engagement by 30%, collaborating across frontend, backend, and CMS layers.

Associate Data Engineer (Apprenticeship) Jun 2022 – Feb 2023

EnLume Technologies Pvt. Ltd. • *Hyderabad, Telangana*

- Worked with Snowflake Data Warehouse and dbt for data processing and query optimization, contributing to a 25% improvement in query performance.
- Applied Agile development practices and contributed to GitHub repositories while collaborating with a 10+ engineer team.

PROJECTS

Niyam Trade — B2B Multi-Broker & Multi-Order Stock Trading Platform Mar 2025 – Present

Tech: Python, FastAPI, React.js, REST APIs, WebSocket, MongoDB, AWS, Grafana Cloud, OpenTelemetry, Payment Integration

B2B stock trading platform supporting multi-broker connectivity and multi-order trading workflows, with real-time market and trading price delivery and integrated payment capabilities. Contributed across trading workflows, backend APIs, frontend functionality, cloud infrastructure, observability, and production delivery.

Niyam Crypto — B2C Cryptocurrency Trading Platform Mar 2025 – Present

Tech: Python, FastAPI, React.js, REST APIs, WebSocket, MongoDB, AWS, Grafana Cloud, OpenTelemetry, Payment Integration

Designed and developed the application from scratch, contributing from technical architecture and technology selection through application flow design, feature development, integrations, testing, and production delivery. Built Algo Trading, Signal Bridge Trading, and F&O Trading capabilities with WebSocket-based real-time market-price delivery, payment workflows, AWS infrastructure, and application observability.

RA Connect — Web & Mobile Application Oct 2025 – Dec 2025

Tech: React.js, REST APIs, Python, AWS, Payment Integration

Designed and developed the application from scratch, contributing across technical architecture, technology and stack selection, application flow design, feature development, backend/API integrations, payment workflows, cloud infrastructure, and production delivery. Delivered functionality across both web and mobile applications and handled the integrations required to take the application from initial design through deployment.

Page Builder — Dynamic Content Management Platform 2023 – 2025

Tech: Node.js, React.js, Payload CMS, REST APIs

Dynamic page-building and content management platform enabling users to create, customize, and manage web pages through a drag-and-drop interface. Developed reusable React.js components and Node.js APIs, integrated Payload CMS, and improved application performance through efficient state management and API integration.

EDUCATION & ACHIEVEMENTS

B.E. in Electronics and Telecommunication Engineering Nashik

Savitribai Phule Pune University

Technical blogs: Common Pitfalls in Website Performance Optimization; Integrating ChatGPT with Payload CMS Plugin

Recognition: LinkedIn Engagement Champion recognition
